

Suriya Periyasamy - Senior Software Engineer

+91 8754714398 (WhatsApp); Email: suriyame2107@gmail.com; LinkedIn: [Suriya Periyasamy](https://www.linkedin.com/in/suriya-periyasamy)

Github: github.com/suriya2109; Leetcode: [Suriya21072109](https://leetcode.com/suriya21072109)

Software Engineer with 3+ years of experience building fast, scalable, and user-focused web applications using **Angular, React, JavaScript (ES6+), TypeScript, HTML5, CSS3, and Tailwind CSS**. Proven track record in optimizing high-traffic systems and improving load times by up to 40% through **lazy loading, code-splitting, and reusable component architectures**. Experienced in **Angular-Drupal integrations, SEO-optimized frameworks**, and performance-first scalable solutions. Currently enhancing expertise in **Data Structures & Algorithms** (106+ LeetCode problems solved), **System Design**, and **AI-driven UI patterns** to create intelligent, automation-focused interfaces. Leveraging **GitHub Copilot** for efficient, clean code and innovation, with strong **communication, leadership, and problem-solving skills** as an active **Toastmasters** member.

• Technical Capability

Strategic Front-End Engineering and Digital Experience Delivery

- **Enterprise Application Development** – Strong expertise in **Angular (v19), React, and TypeScript**, with hands-on experience in **JavaScript (ES6+), HTML5, CSS3, Node.js, and Tailwind CSS**. Proficient in building scalable, high-performance web platforms, leveraging **lazy loading, code optimization, and state management** to deliver exceptional user experiences. Utilizes **GitHub Copilot** to enhance productivity, accelerate development cycles, and maintain cleaner, more efficient codebases.
- **System Integration & Optimization**: Developed reusable UI modules with **component-based design, BEM conventions**, and responsive layouts ensuring cross-device compatibility.
- **Collaboration** – Partnered with **cross-functional teams** across design, back-end, and product verticals to ensure timely, quality-driven delivery. Recognized as the **go-to front-end engineer** for UI scalability, consistency, and technical excellence.
- **Continuous Improvement & Technical Growth** – Actively strengthening technical depth through **Data Structures & Algorithms** practice and **System Design learning**. Adopting **AI-assisted development tools like GitHub Copilot** to drive innovation, improve problem-solving efficiency, and elevate engineering excellence.

• Current Role – Novac Technology Solutions. – Senior Software Engineer | July 2022 – Present

Driving the organization's front-end technology vision across enterprise web applications, performance engineering, and AI-enhanced user experiences. Leading the design and optimization of Angular-based digital platforms, integration of intelligent UI systems, and development of modular, scalable front-end frameworks for FinTech and insurance.

- Defining the **UI/UX roadmap** for modern, maintainable front-end architectures.
- Aligning engineering execution with **AI-driven, data-informed design strategies**.
- Collaborating with cross-functional teams to **modernize legacy systems** and implement performance-focused innovations.
- Translating complex business requirements into **reusable, scalable, and future-ready digital experiences** aligned with user needs and business growth.

• Project Experience

Project Name	Description of Work	Impact
Shriram Finance Ltd – Retail & Payment Platforms	• Designed and developed multiple Angular-based FinTech modules for Mobile Recharge, Landline, DTH, FASTag, Electricity, LPG/Gas, Broadband, Water, Cable TV, Credit Card, Loan Repayment, and Insurance services. • Built and maintained dynamic insurance and vehicle marketplaces (Two-Wheeler, Four-Wheeler, EV Hub) using Angular, RxJS, SCSS, and BEM architecture. • Integrated real-time APIs for bill payments and product comparison dashboards. • Managed Drupal CMS and customer journey pages for content and campaign management.	• Enhanced UI responsiveness by 40%. • Improved user engagement and scalability. • Supported millions of monthly transactions across 15+ integrated modules.
Shriram Life Insurance Ltd (SLIC)	• Built responsive UI modules for the Life Insurance portal using Angular, RxJS, and Chart.js. • Integrated REST APIs for policy management and dashboard analytics. • Developed interactive calculators — BMI, Children's Savings, Smoking, Human Life Value, Double Your Money, Savings Plans, Retirement, and HRA Calculators. • Managed CMS-driven customer journey pages for campaign and content updates.	• Delivered intuitive, high-performing calculators that boosted lead conversions. • Improved customer engagement and streamlined policy comparisons.
Travel Insurance Consultants (TIC)	• Developed a Next.js + React-based travel insurance platform for global users under Novac Technology Solutions. • Built key modules — Contact Us, Get a Quote, Policy Assistance, Claims, and Help Centre. • Created category pages for Holiday, Business, Student, Group, Domestic, and Schengen Travel Insurance. • Implemented coverage detail pages for medical, cancellation, adventure, and accidental coverage. • Integrated self-service portals and CMS-managed journey pages.	• Delivered a responsive, multilingual platform improving global accessibility. • Reduced claim drop-offs and enhanced user trust through optimized UI workflows.

Shriram Asset Management Company (SAMC)	- Developed a Next.js and React-based mutual fund and investment platform using React Hooks for state and lifecycle management. - Implemented key modules — All Funds, Fund Details, NFO, NAV Tracking, SIP, Lumpsum, and Goal Calculators. - Integrated CMS and customer journey pages for investor education, fund discovery, and compliance (KYC, SEBI, AMFI). - Optimized for SEO, accessibility, and performance.	- Delivered a scalable, SEO-optimized platform with faster navigation and improved investor engagement. - Enhanced data transparency through real-time fund tracking.
Novac Technology Solutions – Digital Transformation Division	- Contributing as a Front-End Engineer in FinTech, InsurTech, Digital Learning, and ImmersiveTech domains. - Built enterprise-grade front ends for ZIVA®, STATIM®, AXLE™, and MIGOTO AI™ using Angular, React, TypeScript, HTML5, CSS3, and Tailwind CSS. - Collaborated with product and design teams to deliver responsive, scalable UI architectures. - Managed corporate portal modules — Discover Us, Leadership, CSR, and Media Resources.	CM: Accelerated deployment timelines through modular architectures. Strengthened Novac's position as a leader in AI-driven digital transformation.

• Education

B.E., Mechanical Engineering; Dhanalakshmi Srinivasan Engineer College, Perambalur - *July 2016 - April 2020*

Undergraduate first class- CGPA: 7.24 / 10.

• Volunteer Activities

Toastmasters International (Jul 2023 – Present)

- Roles:** Member & Area Public Relations (PR) Officer (served twice)
- Key Contributions & Achievements:**
 - Leadership:** Organized club events, coordinated between multiple clubs in the area, and led PR campaigns to attract new members.
 - Public Speaking:** Delivered multiple prepared and impromptu speeches, improving presentation, articulation, and audience engagement skills.
 - Networking & Collaboration:** Built strong professional relationships across clubs; mentored newer members on speech delivery and leadership roles.
 - Event Management:** Managed club communications, newsletters, and social media campaigns to boost visibility and participation.
 - Recognition:** Successfully promoted Toastmasters' programs, helping increase club membership and engagement.

• Awards

Awards

- Quarterly Star Performer:** Awarded for **successful delivery of three critical projects** with 100% on-time completion and **zero major defects**; showcased **project management, problem-solving, and quality-focused execution**.
